

ARYAN PANWAR

Product Manager | Associate Product Manager | 0→1 Product Execution

+91-7817060230 | aryanpanwar10005@gmail.com | aryanpanwar.in | linkedin.com/in/aryan-panwar1 | github.com/Aryanpanwar10005

PROFESSIONAL SUMMARY

Product Manager (APM-track), ECE graduate (June 2026), 9 shipped products across B2B SaaS, open-source tools, and consumer AI. On most I've been sole founder and engineer — research, PRD, OKRs/KPIs, prioritization, and GTM, owned end to end — including an AI stylist app that pulled 20.8K+ organic impressions in six months with zero paid spend. Because I also write the code (Python, LLM APIs, FastAPI, React), I can scope a feature and go build it, not just spec it and hand it off. Data-driven via PostHog/GA4 and A/B testing; Agile delivery through Jira.

CORE COMPETENCIES

Product Strategy & Execution: Product Roadmap · 0→1 Launches · PRD & User Stories · OKRs & KPIs · Prioritization · GTM · Release Management

Research & Analytics: Market & Competitive Research · User Research · Product Analytics (PostHog, GA4) · SQL · A/B Testing · Funnel Analysis

Cross-Functional Delivery: Engineering & Design Partnership · Agile/Scrum · Sprint Planning · Backlog Management · Jira · Stakeholder Management

Also Technical: Python · LLM APIs · FastAPI · React · Ships Own Code

WORK EXPERIENCE

Instrumentation Engineering Intern — Indian Potash Limited (Distillery & Co-Gen Unit), Rohana Kalan, Muzaffarnagar, UP
Jun 2025 – Aug 2025

- Owned instrumentation duties across a live molasses-based distillery and co-generation power unit — calibrated and maintained sensors across boilers, core plant-control systems, and the full production pipeline
- Built working fluency in how a large industrial plant actually runs end-to-end — automation logic, control systems, and the manual processes still holding it together — and turned technical/sensor data into documentation operations stakeholders used for predictive-maintenance decisions

PROJECTS

FitWardrobe — Privacy-First AI Stylist App (Sole Founder & Product Manager) [Web-Page](#) | [GitHub](#)

Jan 2026 – Present | 0→1 Product Ownership · PRD & OKRs · GTM · A/B Testing

- Owned the product lifecycle end-to-end for a privacy-first AI stylist app (Android + PWA): market research, PRD authoring, OKR/KPI definition, and feature prioritization for Gemini Vision + Groq LLM-powered clothing recognition and outfit generation
- Drove GTM with zero paid spend — 20.8K+ Google impressions, 315 clicks, 1.5% CTR in 6 months; found a Day-1 onboarding drop-off through PostHog/GA4 funnel analysis, ran an A/B test, and shipped a fix that improved activation

Mithivoices — Open-Source AI Voice Platform [GitHub](#)

Dec 2025 – Present | Product Scope & Roadmap · Community-Driven Prioritization

- Defined product scope and roadmap for an open-source multi-LLM voice platform; prioritized a backlog covering 19 neural voices across 8 languages and sub-450ms real-time inference, shipping v0.2.0 within 30 days, and treated open-source contributors as stakeholders by folding their feedback into the release roadmap

SEO & GEO Optimizer — AI-Powered SEO Tool [GitHub](#) | [npm](#)

Feb 2026 – Present | Market & Competitive Research · Requirements Definition

- Conducted market and competitive research across official Google/Bing documentation; defined product requirements for a 10-phase workflow with human-in-the-loop validation, and drove distribution/GTM for the resulting open-source npm package across 6 AI dev environments

Credex — AI Tool Spend Audit Platform

2026 – Present | 0→1 Product Ownership · Market Need Identification

- Identified a market need — engineering managers lacking visibility into AI tool subscription spend — and took a free web app from concept to launch, using the Cerebras Cloud SDK for LLM-powered spend analysis and automated audit reports

EDUCATION

B.Tech — Electronics & Communication Engineering | MIET, Meerut, UP | Published Researcher — [JETIR](#) (IF 7.95)

Jul 2022 – Jun 2026

CERTIFICATIONS

- Enterprise Product Management Fundamentals — Microsoft / Coursera — Mar 2026
- Google AI Essentials Specialization — Google / Coursera — Feb 2026
- Intro to Transformer-Based NLP — NVIDIA Deep Learning Institute — Feb 2026
