PROFESSIONAL SUMMARY

GenAI Engineer and ECE graduate (June 2026) who likes taking an AI idea from a rough prompt to something people actually use. I've wired up several LLM providers — Claude, OpenAI, Gemini, Groq, Cerebras — into real products, including an open-source voice pipeline running in 8 languages at sub-450ms inference, and an AI stylist app that pulled 20.8K+ organic impressions in six months. Comfortable across the stack: Python/FastAPI on the backend, React/TypeScript on the front end, CI/CD through GitHub Actions. I also pick up product work — PRDs, KPIs, A/B testing — when a project needs it. Certified in AI Essentials (Google) and Transformer-Based NLP (NVIDIA).
