

ARYAN PANWAR

Technical Program Manager | Cross-Functional Delivery | Engineering & Product Alignment

+91-7817060230 | aryanpanwar10005@gmail.com | [aryanpanwar.in](https://www.linkedin.com/in/aryan-panwar1) | [linkedin.com/in/aryan-panwar1](https://www.linkedin.com/in/aryan-panwar1) | github.com/Aryanpanwar10005

PROFESSIONAL SUMMARY

Technical Program Manager background built across 9 shipped products, where the job has usually meant breaking a big, messy initiative into technical specs and milestones, managing risk and dependencies between engineering and business stakeholders, and owning delivery from scope through release — often as the only person doing it. Writing the code myself (Python, LLM APIs, multi-agent systems) means I can actually talk to engineering instead of just relaying requirements between meetings. Agile delivery through Jira, plus OKRs/KPIs and product analytics (PostHog, GA4) to track what's really happening. Certified in Enterprise PM (Microsoft), AI Essentials (Google), and Transformer-Based NLP (NVIDIA).

CORE COMPETENCIES

Program & Technical Delivery: Cross-Functional Program Management · Technical Roadmap Planning · Program Governance · Risk & Dependency Management · Milestone Tracking · Release Management

Agile & Engineering Collaboration: Agile/Scrum · Sprint Planning · Backlog Management · Jira · CI/CD Pipelines · Technical Specifications

Stakeholder & Metrics: Executive & Cross-Team Communication · OKRs & KPIs · Data-Driven Decision Making · A/B Testing · Product Analytics (PostHog, GA4)

Technical Stack: Python · LLM APIs (Claude, OpenAI, Gemini) · FastAPI · Multi-Agent Systems · Workflow Automation (N8n) · React/Node.js · GitHub Actions/CI-CD

WORK EXPERIENCE

Instrumentation Engineering Intern — Indian Potash Limited (Distillery & Co-Gen Unit), Rohana Kalan, Muzaffarnagar, UP
Jun 2025 – Aug 2025

- Coordinated cross-team troubleshooting throughout a molasses-based distillery and co-generation power unit — calibrated sensors across boilers, plant-control systems, and the full production pipeline, and turned findings into structured documentation used by teams for predictive-maintenance and audit-readiness

PROJECT EXPERIENCE (TECHNICAL PROGRAM MANAGEMENT FOCUS)

FitWardrobe — Privacy-First AI Stylist App (Sole Founder & Technical Program Lead) [Live Demo](#) | [GitHub](#)

Jan 2026 – Present | Roadmap Ownership · Cross-Stack Dependency Coordination · A/B Testing

- Owned the technical roadmap end-to-end across on-device AI inference, backend (Supabase/FastAPI), and analytics layers; defined OKRs & KPIs and sequenced milestones from PRD to v1.0.1 release, coordinating dependencies across the stack
- Identified a Day-1 onboarding drop-off in PostHog funnel data, ran A/B tests to validate a fix, and drove it into the v1.0.1 release

SEO & GEO Optimizer — 10-Phase Agentic Workflow Automation Tool [npm](#) | [GitHub](#)

Feb 2026 – Present | Technical Specification Authoring · Multi-Platform Release Coordination

- Authored a 1,400-line technical specification governing a 10-phase workflow automation program with human-in-the-loop validation checkpoints, sourced from official Google/Bing documentation and verified against 2025 Core Web Vitals
- Coordinated release validation across 6 AI dev environments (Cursor, Windsurf, GitHub Copilot, Replit, Lovable, Bolt) as independent integration checkpoints; published open-source npm package v1.2.0

Mithivoices — Open-Source AI Voice Platform [GitHub](#)

Dec 2025 – Present | Program Scope & Milestones · Cross-Contributor Coordination · CI/CD Ownership

- Defined program scope, milestones, and technical acceptance criteria for a multi-LLM voice platform, driving delivery of v0.2.0 within 30 days (19 neural voices, 8 languages, sub-450ms latency); owned the CI/CD pipeline and coordinated a distributed contributor base through structured, acceptance-tested release cycles

Credex — AI Tool Spend Audit Platform

2026 – Present | Scope Definition · Market Need Identification

- Scoped and delivered a free web app from concept to launch for engineering managers to audit AI tool subscriptions and flag redundant spend, using the Cerebras Cloud SDK for LLM-powered analysis and automated reporting

EDUCATION

B.Tech — Electronics & Communication Engineering | MIET, Meerut, UP | Published Researcher — [JETIR](#) (IF 7.95)

Jul 2022 – Jun 2026

CERTIFICATIONS

- Enterprise Product Management Fundamentals — Microsoft / Coursera — Mar 2026
- Google AI Essentials Specialization — Google / Coursera — Feb 2026
- Intro to Transformer-Based NLP — NVIDIA Deep Learning Institute — Feb 2026
