

ARYAN PANWAR

Product Manager | Associate Product Manager | 0→1 Product Execution

+91-7817060230 | aryanpanwar10005@gmail.com | aryanpanwar.in | linkedin.com/in/aryan-panwar1 | github.com/Aryanpanwar10005

PROFESSIONAL SUMMARY

Product Manager (APM-track) and ECE graduate (June 2026) with 9 shipped products behind me, across B2B SaaS, open-source developer tools, and consumer AI apps. On most of these I've been sole founder and engineer, so I've done the full lifecycle myself — research, PRD, OKRs/KPIs, prioritization, and GTM — including an AI stylist app that pulled 13.9K+ organic impressions in three months and an open-source voice platform now live in 8 languages. Because I can also write the code (Python, LLM APIs, FastAPI, React), I can scope a feature and then go build it, not just spec it and hand it off. Data-driven via PostHog/GA4 and A/B testing; Agile delivery through Jira. Certified in Enterprise PM (Microsoft), AI Essentials (Google), and Transformer-Based NLP (NVIDIA).

CORE COMPETENCIES

Product Strategy & Execution: Product Roadmap · 0→1 Product Launches · PRD & User Stories · OKRs & KPIs · Feature Prioritization · GTM Strategy · Release Management

Research & Analytics: Market & Competitive Research · User Research · Product Analytics (PostHog, GA4) · A/B Testing · Funnel Analysis · Data-Driven Decision Making

Cross-Functional Delivery: Engineering & Design Partnership · Agile/Scrum · Sprint Planning · Backlog Management · Jira · Stakeholder Management

Technical Fluency: Python · LLM APIs (Claude, OpenAI, Gemini) · FastAPI · React/Node.js · API Integration · Git/GitHub Actions · Ships Own Code

WORK EXPERIENCE

Instrumentation Engineering Intern — Indian Potash Limited, Muzaffarnagar, UP

Jun 2025 – Aug 2025

- Analyzed sensor performance data (RTD, pressure, flow) and documented behaviour patterns and failure modes to support predictive maintenance decisions; collaborated with operations teams to translate technical findings into structured process improvements in a live industrial environment

PROJECTS

FitWardrobe — Privacy-First AI Stylist App (Sole Founder & Product Manager) [Web-Page](#) | [GitHub](#)

Jan 2026 – Present | 0→1 Product Ownership · PRD & OKRs · GTM · A/B Testing · Funnel Analysis

- Owned the product lifecycle end-to-end for a privacy-first AI stylist app (Android + PWA): market research, PRD authoring, OKR/KPI definition, and feature prioritization for Gemini Vision + Groq LLM-powered clothing recognition and outfit generation
- Drove GTM with zero paid spend — 13.9K+ Google impressions, 168 clicks, 1.2% CTR in 3 months; found a Day-1 onboarding drop-off through PostHog/GA4 funnel analysis, ran A/B tests, and shipped a fix that improved activation

Mithivoices — Open-Source AI Voice Platform [GitHub](#)

Dec 2025 – Present | Product Scope & Roadmap · Community-Driven Prioritization · Release Management

- Defined product scope and roadmap for an open-source multi-LLM voice platform; prioritized a backlog covering 19 neural voices across 8 languages and sub-450ms real-time inference, shipping v0.2.0 within 30 days
- Treated open-source contributors as stakeholders — gathered their feedback and folded it into a prioritized release roadmap

SEO & GEO Optimizer — AI-Powered SEO Tool [GitHub](#) | [npm](#)

Feb 2026 – Present | Market & Competitive Research · Requirements Definition · Open-Source GTM

- Conducted market and competitive research across official Google/Bing documentation; defined product requirements for a 14-phase workflow with human-in-the-loop validation gates, verified against 2025 Core Web Vitals
- Drove distribution/GTM for an open-source npm package adopted across 6 AI dev environments (Cursor, Windsurf, Copilot, Replit, Lovable, Bolt); shipped v1.2.0 across 2 releases

Credex — AI Tool Spend Audit Platform

2026 – Present | 0→1 Product Ownership · Market Need Identification · Feature Prioritization

- Identified a market need — engineering managers lacking visibility into AI tool subscription spend — and took a free web app from concept to launch, defining scope for subscription auditing and redundancy flagging
- Prioritized an automated reporting feature powered by the Cerebras Cloud SDK for fast LLM-based spend analysis, generating shareable audit reports for target users

EDUCATION

B.Tech — Electronics & Communication Engineering | MIET, Meerut, UP | CGPA: 7.00/10 | Published Researcher — JETIR (IF 7.95)

Jul 2022 – Jun 2026

CERTIFICATIONS

- Enterprise Product Management Fundamentals — Microsoft / Coursera — Mar 2026
- Google Prompting Essentials Specialization — Google / Coursera — Mar 2026
- Google AI Essentials Specialization — Google / Coursera — Feb 2026
- Intro to Transformer-Based NLP — NVIDIA Deep Learning Institute — Feb 2026
